

# Little Seed

Sing to tune of 5 current buns.	
It's Autumn and wind blows the seeds through the air, They flitter and flutter to goodness knows where.	Balloon pump
They fly very high and close to the sun, So close in fact that it even burned one.	Spot light linked to switch
They fly over the sea where they only wish, They don't get eaten by any fish.	Ocean sensory pouch
One little seed lands in the dry, desert sand. It's too hot so it doesn't grow.	Sand
They drop to the ground when a bird comes along, And eats one up before very long.	Feather duster
One little seed is taken by a small, grey mouse. He takes it away into his house.	Mouse sound
Then Winter arrives, they get covered in snow, Now I wonder will they grow?	Fake snow
In Spring it rains and the seeds get wet, They'll grow in to flowers - big ones I bet!	Rain stick
In Summer the children come out to play, A girl comes along and takes a flower away.	Flowery essential oil
Bees and Butterflies dance all around, They make their buzzing and fluttering sound.	Honey to smell
It's Autumn now and the wind spins the vanes, It blows seeds from the flower and it all starts again.	Balloon pump
